

Identity Theft Information for Taxpayers

Identity theft places a burden on its victims and presents a challenge to many businesses, organizations and governments, including the IRS. The IRS combats this crime with an aggressive strategy of prevention, detection and victim assistance.

What is tax-related identity theft?

Tax-related identity theft occurs when someone uses your stolen Social Security number to file a tax return claiming a fraudulent refund. If you become a victim, we are committed to resolving your case as quickly as possible.

Know the warning signs

In tax-related identity theft, the criminal generally will use a stolen SSN to file a forged tax return and attempt to get a fraudulent refund early in the filing season.

You may be unaware that this has happened until you file your return later in the filing season and discover that two returns have been filed using the same SSN.

Be alert to possible identity theft if you receive an IRS notice or letter that states:

- More than one tax return was filed for you,
- You owe additional tax, have a refund offset or have had collection actions taken against you for a year you did not file a tax return, or
- IRS records indicate you received wages from an employer unknown to you.
